

FOR IMMEDIATE RELEASE

**CHAPMAN INNOVATIONS ACCEPTING DONATIONS FOR THE NATIONAL
FALLEN FIREFIGHTERS FOUNDATION AT FDIC**
*The Company will be Giving Away Free “Supporting America’s Bravest” T-Shirts and
Accepting Donations*

Salt Lake City (April 3, 2008) – Chapman Innovations, manufacturers of CarbonX[®] non-flammable fabrics, announced today that it is working to raise awareness and increase support for the National Fallen Firefighters Foundation (NFFF, www.firehero.org) through a “Supporting America’s Bravest” t-shirt giveaway at its booth, #153, during the FDIC show April 10 -12 at the Indiana Convention Center in Indianapolis. Chapman Innovations will also be accepting donations, 100 percent of which will go to the Foundation.

“The Chapman Innovations team greatly appreciates the sacrifice firefighters make everyday as they risk their lives, to save our property and our lives,” said Bob Goulet, chief operating officer, Chapman Innovations. “Not only do we want to help protect the firefighters from burn injuries with our non-flammable fabrics, we also want to help honor those heroes who have fallen in the line of duty and support their families. The NFFF is doing amazing work, we want to help them in any way we can.”

Congress created the NFFF to lead a nationwide effort to honor America's fallen firefighters. Since 1992, the nonprofit Foundation has developed and expanded a wide range of programs that honor and remember America’s fallen firefighters and provide support and resources for their families and co-workers.

“We are so thankful for Chapman Innovations’ generosity and grateful that they have offered to donate these t-shirts and procure donations for our Foundation,” stated Catherine Hedrick, director of survivor programs, NFFF. “The funds raised at the show will be used to provide services and resources to the families and co-workers who have lost a firefighter.”

About CarbonX[®]

CarbonX[®] fabrics are based on patented blends of high-performance fibers that will not ignite, burn, char, shrink or significantly decompose when exposed to intense flame, molten metal, arc flash or high heat. Even after intense exposure, CarbonX maintains its integrity and continues to protect. These capabilities are why CarbonX is the best non-flammable fabric on the market today.

About Chapman Innovations[®]

Founded in the late 1990s, Salt Lake City-based Chapman Innovations develops, produces and markets thermal fabric solutions for a variety of industries and end-uses. Chapman's products exceed industry specifications, and on a daily basis protect people that work in some of the world's most hazardous environments.

About National Fallen Firefighters Foundation

The United States Congress created the National Fallen Firefighters Foundation to lead a nationwide effort to remember America's fallen firefighters. Since 1992, the tax-exempt, nonprofit Foundation has developed and expanded programs to honor our fallen fire heroes and assist their families and co-workers.
