Demonstrably Superior

343 WEST 400 SOUTH • SALT LAKE CITY, UTAH 84101
TEL: 801.415.0025 • FAX: 801.415.2001 • WWW.CARBONX.COM

AVAILABLE IN KNITS, WOVENS, AND NONWOVENS, CARBONX FABRICS AND APPAREL ARE USED IN A WIDE VARIETY OF PROTECTIVE APPLICATIONS FOR TODAY'S MOST HAZARDOUS ENVIRONMENTS.

DEMONSTRABLY SUPERIOR PROTECTION

CarbonX® fabrics and apparel deliver ultimate protection when safety matters most. Our fabrics are inherently flame resistant (FR) and are comprised of a proprietary blend of high-performance fibers that provide an extraordinary level of protection against direct flame, extreme heat, molten metal, hot/flammable liquids, and arc flash.

CarbonX products will not burn, melt, or ignite, and they significantly outperform other FR options. In field tests conducted over the course of several years and across multiple applications, our fabrics have consistently proven their ability to withstand heat and direct flame for up to 20 times longer than competitive products.

CarbonX products also combine comfort with an extreme level of protection. They are lightweight, flexible, and odor-resistant. They also breathe well, wick away moisture, and dry quickly, enhancing the wearer's comfort and productivity.

Laundering does not affect the protective properties of our products. Because they are inherently flame resistant, the thermal protection will not wash out or wear away. Our products are machine washable and easy to care for. Apparel can be worn daily as part of a total personal protective equipment (PPE) solution, providing significant value to users.

Professionals and enthusiasts who work and play in some of the world's most hazardous environments rely on CarbonX to provide them with the protection they deserve.

CARBONX ULTIMATE

The highest level of thermal protection.

CARBONX ACTIVE

Extraordinary performance and added comfort in a lighter weight fabric.
